

Task Manager Pro: User Handbook

Welcome to the Task Manager Pro Handbook. This document is designed to provide role-specific guidance for Admin, Manager, and Employee users across Operations, Legal, and Finance departments.

Part 1: Administrator Role

The Administrator has full system access, including user management, departmental setup, and global analytics. The platform is accessed through a secure landing page. Users can sign in using their official credentials.

![Landing Page](./landing_page_1773048070179.png)![Login Page]
(./clean_login_page_1773048147429.png)

Note: Ensure you have your 2FA (Two-Factor Authentication) device ready if prompted after entering your password.

Executive Dashboard

Upon logging in, you are presented with the Dashboard. This provides a high-level overview of system metrics, task distribution, and recent trends.

Admin Dashboard

Key Metrics monitored:

- **Total Clients & Active Projects:** Essential for Operations and Finance tracking.
- **Task Distribution:** Visual breakdown of workload across different stages.
- **Weekly Trends:** Monitoring productivity and output over time.

Workflow & Approval Management

This is a critical module for Finance and Operations to manage and approve business processes.

Workflow Management

- **Approval Queue:** View and process pending requests.
- **Workflow History:** Audit trail of all approved or rejected requests (Critical for Legal/Audit).

Task Management

The central hub for tracking project progress and resource allocation.

Task Management

- **Task Filters:** Filter by priority (High/Medium/Low) or status.
- **Project Context:** All tasks are associated with specific projects for clear billing and tracking.

Organizational Structure

Manage team members and departments to ensure correct access levels and resource management.

The screenshot displays the 'Users' management interface. The left sidebar contains navigation links: Dashboard, Users & Teams (active), Clients, Departments, Tasks, Projects, Workflow, Notifications, Analytics, Documents, and Chat. The top right shows the user 'Myadmin' with email 'korapatishwini@gmail.com'. The main content area is titled 'Team Members' with the subtitle 'Manage your team members and their permissions'. It features three summary cards: 'Total Members' (5), 'Active Members' (5), and 'Inactive Members' (0). Below these is a search bar and three filter dropdowns: 'All Roles', 'All Status', and 'All Departments'. A table lists the team members:

MEMBER	EMAIL	ROLE	DEPARTMENT	STATUS	ACTION
Myadmin User	korapatishwini@gmail.com	Admin	-	Active	
Ashwini Senior Developer	akashsubba798@gmail.com	Manager	Development	Active	
Demo user Developer	ashwinisubba25@gmail.com	Employee	Development	Active	

User Management

The screenshot displays the 'Department Management' interface. The left sidebar is identical to the previous page, with 'Departments' (note the typo) now active. The top right shows the user 'Myadmin'. The main content area is titled 'Department Management' with the subtitle 'Organize and manage your company departments'. It features four summary cards: 'Total Departments' (5), 'With Managers' (2), 'Filtered' (5), and 'Total Managers' (1). Below these is a search bar and a 'Showing 5 of 5 departments' indicator. A table lists the departments:

Department	Manager	Created	Actions
D Development ID: 1	Unassigned	Feb 25, 2026	
D Devops ID: 2	Ashwini	Mar 4, 2026	
S Sales Force ID: 3	Unassigned	Mar 4, 2026	

Department Management

- **Roles & Permissions:** Fine-grained control over who can view or edit data.
- **Departmental Logic:** Grouping users for better reporting and workflow distribution.

Analytics & Compliance Reporting

Comprehensive data visualization for strategic decision-making and compliance checks.

Tip: Use the Analytics module to generate reports for end-of-quarter reviews or audit requirements.

Note: The Admin role has the highest level of oversight for compliance and auditing.

Part 2: Manager Role

The Manager role focuses on team productivity, project oversight, and workflow approvals. Managers can track multiple projects and ensure task deadlines are met.

1. Manager Dashboard

The Manager Dashboard provides a consolidated view of team-specific metrics, including active tasks, project counts, and overdue items.

Manager Dashboard

Manager Tasks

Manager Workflow

Key Manager Features:

- **Project Closure Requests:** Submit projects for final sign-off (Legal/Finance).
- **Task Approval Queue:** Review and validate task completions from the team.
- **Team Resource Oversight:** Visual breakdown of workload (Pending/In Progress/Completed).

Part 3: Employee Role

Individual contributors focus on managing their assigned tasks and providing updates on project progress.

1. Employee Dashboard

The Employee Dashboard provides a visual analysis of individual tasks, status distribution, and upcoming deadlines.

2. Personal Task Management

Employees can track their assignments and maintain checklists aligned with manager expectations.

My Tasks

Task Details

Key Employee Features:

- **Task Lifecycle:** Update tasks from "Pending" to "In Progress" and eventually "Completed".
- **Timeline & History:** Track time spent and view the history of task updates.
- **Reassignment Requests:** Request task reassignment if blocked or due to capacity issues.

This handbook is a living document and will be updated as new features are integrated.
